Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 11 remains rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "wherein the fermented mixture is diluted with non-fermented mixture", in claim 11, is indefinite. It is unclear from the claim and specification (page 13) as to what is encompassed by the "non-fermented mixture". Applicants, referring to page 13 of the specification, have stated that this may correspond to the same original mixture used in claim 1, part (i), or simply some other composition which has not been fermented. However, the metes and bounds of the claimed invention remain unclear, with regard to what is included or excluded by the language of "non-fermented mixture", since this may be practically any composition available, whether effective in the claimed method, or not.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,7 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Schol et al. (US PAT 5,308,628). The reference and rejection are maintained as cited in a previous Office action.

Applicant's arguments filed January 14, 2003, have been fully considered but they are not persuasive. At page 3 of the response, applicants state that "the Office points to no teaching that the pH should be stopped before the fermentation mixture drops below 5.5, as presently recited." This is not deemed persuasive for the reasons of record. At page 3 of the previous Office action, where it is stated that Schol et al. ferment a lactic-acid bacterial culture in a milk composition "until the mixture reaches a

Art Unit: 1761

pH in the range of between 4.3 and 5.5. The pH is not regulated during the fermentation." A pH of 5.5 reads upon the instantly-claimed invention.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schol et al. The reference and rejection are maintained as cited in a previous Office action. Applicants did not specifically address this rejection, and thus it is maintained for the reasons of record.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
